Etym. A *dim.* < L. *pullus*, *v.* Pulcella, and Skeat, *sub* Punch. Pianigiani's account of the word is as follows: A Neapolitan vocabulary of 1789 says, "In the last century a company of strolling players were attacked by robbers near Acerra but beat them off with the help of a countryman, named Puccio d' Aniello, who had a queer-looking face with a long nose all blackened by the sun. After their victory they were unwilling to let him go and took him into their company. He was agreeable to this and made himself a favourite with the public by his sallies of wit. His 'mask' and character took their place in the theatrical world under the name of Pulcinella." This anecdote is not generally accepted, and some derive the term from the Neapolitan Pollecinella, *dim.* of Pollecena, turkey pullet, to the beak of which the nose of Pulcinella bears a resemblance; others refer to a certain Paulo Cinella, who is said to have acted the part of a buffoon in the time of Charles of Anjou. Andrea Perrucci, who lived in the 16th century, states that the type was invented by Silvio Fiorello, a comedian, and perfected by Andrea Calcese, surnamed Ciuccio, who died in 1656, taking as his model the country-folk near Acerra. Génin states that it is the Maccus of the old Atellane plays: and in 1727 a statue was found at Acerra, near Aversa, the ancient Atella, with pointed cap and double hump like the French and English Punch. This, however, though it may illustrate the antiquity of the "mask," does not explain its etymology, which is modern.

The French Punch has two humps, either from the classical prototype or in caricature of the cuirasses of the time of Henry IV; he is a bravo and first-class ruffian, whilst the Neapolitan Punch is a fool and a coward, laughed at by everybody for his mistakes, and when he undertakes anything makes a frightful mess of it. He is a wretched creature, but content with his misery: a dish of macaroni and the climate of Naples make up his paradise.

Aff. -aménto, -atóre, -atrice, -atura.

☞ There is considerable difference between English and Italian punctuation, commas being often inserted without interruption to the sense but merely to draw some of the words together, when the same punctuation in English would indicate an interruption. For instance, Ahi quanto io vorrei, innanzi che la mia mano diritta notasse, ch' ella scrivesse, e per l' usate acque a te mi portasse (*transl.* of Ovid's *Leander to Hero*), where the commas after vorrei and notasse if given the force they would have in English printing would reverse the meaning and make nonsense of the sentence. The sense is of course Would my hand were swimming rather than writing, whilst the commas make it look to an English eye as if it was Would my hand, rather than swimming, were writing.

(*b*) *fig.* in play, to begin winning, (*c*) Far — da sè, to prefer living alone.

Etym. dub. *Cogn.* Fr. *race*, Provenç. and Span. *raza*, Portug. *raça*. The fact that no word of the group appears earlier than the latter part of the Middle Ages excludes immediate derivation either from O.H.G. or from Latin. Three suggestions then remain open: (1) Slavonic (regarded as possible by Hatzfeld and Darmstetter, Dict. franç., "*Race*, < It. razza, *d'origine incertaine, peut-être slave*"), *viz.* < the Slavonic word *raz*, translated by Körting as *Schlag, Gepräge, Gattung*, = imprint, species. (2) Körting, objecting to this because the *z* in *raz* is soft, considers Fr. *race* to be "presumably a verbal substantive < *racer*, < ***raptiare* (*cp. chasser*, < ***captiare*), to cultivate a breed of hawks, hence to be a breeder, generally." (3) Pianigiani, quoting the middle Italian form Ragia, inclines to an Arabic source, *viz.* *râs*, = origin, beginning, so that the introduction of the word into Europe would be from the Spaniards. *Cp.* Skeat, *sub* Race.

Rog-are (**A**) (L.); (*leg.*) 1. to draw up a deed. 2. on the part of a notary, to attest its execution. -arsi, to be notarially attested. 3. -arsi di, to obtain attestation of.

☞ Rogare in Latin means "to ask," probably from the root *reg*, to stretch, so that the original sense is that of stretching out for. As a law term it meant to propose a law for approval and adoption, or a candidate for approval and election to office; the presiding magistrate invited (*rogabat*) the *centuriae* to give their vote. The use of the word in Italian may be attributed to this use of it in Latin, since the drawing up of a deed may be regarded as formulating it for submission to and, if approved, execution by, the party interested. Similarly the notarial attestation of a deed may be regarded as its submission to the notary for his approval as a witness.

†(**B**) (either short for Arrogare or a corruption of Rugare) i. of dogs, to snarl. ii. = Brontolare, Gridare; Non mi —, don't roar at me.

Ronzíno *m.*; horse of a sorry kind, nag.

Etym. (from Körting) "To the Germanic stem *ross-* (**hrossa-) there seems to belong the following group of words, though, it must be allowed, with a very curious phonetic development, *viz.* It. rozza, mare, ronzino, nag (mlt. *runcinus*), Provenç. *rossa* (> *rossi-s*, *roc-is*, nag) and *ronci-s* (mlt. *runcinus*), probably the name of Ronce-val, Fr. *rosse*, *roussin*, stallion cob, old Fr. *roncin*, Picard *ronchin*, Span. *rocin* (> *rocinante*), Portug. *rossim*, see Diez, *sub* Rozza. Diez remarks at the end of this article 'Both words—*i.e.* Runcinus and Rozza—require a more searching investigation,' an observation which still holds good, but the means are unfortunately not forthcoming. Mackel writes 'It is difficult to connect Fr. *rosse*, etc. with Germanic *ross-*.' The solution may perhaps be as follows: (1) *Rozza*, *rossa*, *rosse*, together with the diminutives which have no *n*, are < Germanic *ross-*, the Ital. *zz* and the Provenç. and Fr. *ss* being due to the influence of rozzo and *russus* (> Fr. *roux*, *rousse*) respectively; it is to be observed that horses of a marked red colour are often crossgrained creatures. (2) Mlt. *runcinus* and the group of words belonging to it are < a stem *runc* (> L. *runco*, hoe, *cp.* Ital. ronca, bill-hook, pike with a curved blade), so that the literal sense of *runcinus* would be poor thin horse with ribs sticking out like hooks or pikes."

S

S, pronounced Èsse, *m.* or *f.*; *pl.* Èssi or Èsse.

1. It is hard in adjectives in -oso, and after a consonant, *e.g.* Arso, Polso, and when doubled, and before a vowel at the beginning of a word. It is soft like the English *z* before *b*, *g*, *l*, *m*, *n*, *r*, *v*, and before *ia*, *ie*, *io* when pronounced together. In the head-words of this book the soft *S* is marked *Ṡ* where it seems desirable to mark the distinction.

2. In composition *S* is usually privative, representing the Latin preposition *ex*, out, or sometimes the Latin prefix *dis-*, but it is frequently intensive, representing the Latin *ex* in the sense of thoroughly, and also occurs as a mere idle prefix with no real force, as in Strapunto. It thus happens that the same word may have two opposite meanings, *e.g.* Sgonfiare.

3. Salpa *f.*; 1. a genus of tunicate molluscs. 2. gold-line (fish), *v.* Boba (2).

Salpare (Sarpare); 1. (*mar.*) to weigh anchor, hence 2. generally, to set out.

Etym. dub. Two suggestions are forthcoming: (1) from Diez: "*Cogn.* Wallachian *sarpà*, Span. and Portug. *zarpar*, Fr. *sarper*, to heave the anchor. Muratori refers to Gr. ἁρπάζω, to snatch, but it would be preferable to look to ἐξαρπάζω, to snatch out, which is also an actual word. The passage from an initial εξ or ξ to a simple *s* is paralleled in Saggio, Sarte, Sesta. A Greek derivation is rendered more probable by the existence of the word in Wallachian."

(2) from Körting: "*Sarp-o*, *-ere*, to scratch (?), to prune; from the stem *sarp-* of this verb were developed presumably 1. a *sb.* ***sarpa*, thing for scratching, > Fr. *sarpe*, *serpe*, gardening knife, Span. *zarpa*, claw, paw, 2. a verb ***sarpare*, to seize with the paw, or hand, as the case might be, particularly to get hold of by separate jerks, *e.g.* a rope which had to be wound up or an anchor to be raised, > Ital. *sarpare*, *salpare*, to raise the anchor, Roumanian *sarpà*, Fr. *serper*, Catalan *xerper*, Span. and Portug. *zarpar*." He proceeds to refer to Diez's derivation without commenting on it. If Körting's derivation is correct a simpler theory of Sarpare would be to suppose that ***sarpa* was applied to the fluke of an anchor, from its shape, for words similar to Sarpa occur in several languages with the sense of sickle, *viz.* Gr. ἅρπη, Lettish *sirpe*, old Bulgarian *srŭpŭ*, Polish *sierp*, Russian *serpŭ*. *Sarpare* would then be to do the needful to the anchor flukes, *i.e.* raise the anchor.

Salviétt-a *f.*; = Tovagliuolo, napkin. *Aff.* -ína *dim.*

Etym. The Fr. *serviette*, It. salvietta and Span. *servilleta*, all meaning "napkin," make a group of somewhat irregular formation; there are difficulties in referring them either to L. *servire* or *salvare.* The Italian word seems borrowed from French, with alteration by attraction from Salvare, the native Italian for "napkin" being Tovagliuolo. Körting accordingly suggests that from old Fr. *serve*, maid-

servant, a *dim.* ***servette* was formed, altered later, after the disappearance of the word *serve*, under attraction from *servir* and *service*, into *serviette*.

Scaltro; clever, smart, shrewd; sometimes with a certain amount of fault implied, like E. sharp.

Etym. dub. The obvious derivation is from *s-* intensive and L. *cautus* with *u* altered to *l* (*cp.* Aldace and Audace) and *r* added for euphony, which agrees perfectly with the sense. On this theory Scaltrire would be the derivative of Scaltro. But it may be the other way about, Scaltrire being the earlier word and formed from L. *scalpturire*, to scratch, like hens, < *scalpere*, to carve, which is Diez's suggestion. Scaltrire would then mean primarily "to engrave like a gem" and so "to smarten."

Etym. In sense of sheet, *cogn.* to Fr. *écoute*, Span. *escota*, < Dutch *schoot* or one of its allied words, *v.* Skeat, *sub* Sheet, Shoot; possibly the name for the magpie may have some similar origin, *cp.* E. scoter, referring to a genus of ducks.

In sense of whey, according to Schade (Altdeutsch. Wtbch., *sub Scotto*), < O.H.G. *scotto*, though the meaning does not perfectly correspond, since *scotto* means curds, not whey, but the analogy of Swiss *schotte*, skim milk, seems to get over this difficulty. *Scotto* is < Germanic root *skud*, to shake, *cp.* Germ. *Schutt*, rubbish, ruins, E. shudder.

Diez prefers derivation < L. *excocta*, quoting the Comascan form Scocia, regarding whey as cooked out from milk. Körting gives both derivations without comment, and indeed there seems no reason why the word should not be a fusion from both sources.

† Scottame *m.*; = Gratile di scotta, foot-rope.

Scott-are *ind.* scòtto (blt. ***excoctare*, *freq.* of L. *excoquere*, to boil thoroughly); 1. to burn, of things too hot to handle but not red-hot, also *fig.* as in E.; Il foco che non mi scalda non vo' che mi -i, *i.e.* I will not stand ill-treatment from one who cannot do me any good; Esser come il carbone che tinge o -a, to be always doing mischief, *lit.* to be like charcoal which either makes one dirty or else burns. 2. to scald by plunging in boiling water, but not long enough to cook.

Sgallinare *ind.* sgallíno; to rob hen-roosts.

†Sgallozzare; = Gorgogliare, to gurgle.

Sgalluzzare; to enjoy oneself.

Etym. dub. The immediate derivation is from Ital. Galluzzare, with prefix of intensive *s-*, a development of Gallare, to be gay, which may either depend upon Gallo, cock, from the cheerful crow or gay appearance of the bird, or, as Körting thinks, on L. *gallari*, to run riot, as the *Galli*, priests of Cybele, or again, as Pianigiani suggests, may be of Germanic origin. The same doubts exist in regard to the word Galloria. Pianigiani writes as follows: "Sgalluzzare to be merry, the meaning being according to some a metaphor from Galluzzo or Galletto as a vivacious creature. But without denying the influence of popular etymology from Galluzzo it seems that the word cannot fail to be connected with O.H.G. *geilisôn*, to be joyous, *geil* = A.S. *gâl*, glad, *geili*, joyousness, *cp.* Gothic *gailjan*, to rejoice, whence also come the words Gallo, in sense of merriment, Galloria, excessive cheerfulness, and Ringalluzzire, to be sprightly, *cp.* old Fr. *gale*, cheerfulness, *galer*, to rejoice."
The word Galluzzo is not to be found as meaning

For the derivation of compounds beginning with the letter S *see the simple word; for the prefixed* S *see* S, *p.* 521, § 2.

a cock, but the existence of the verb Galluzzare suffices for the argument above quoted.

Ṡgamb-are (**A**) (It. gamba); to walk fast. -arsi, to walk oneself off one's legs. *Aff.* -ata *sb.* run.

Si (**A**) (L. *se*); oneself. Before an *i* or in poetry before other vowels the *i* of Si is replaced by an apostrophe ; S' intende, of course. With a verb it is either reflective or reciprocal, Spogliarsi, to undress ; Si battono, they are fighting with each other. Often pleonastic ; Il fatto si è, the fact is. Si morì, he died. As an indefinite pronoun it serves like Fr. *on*, Germ. *man*, E. one. Col denaro si ha tutto ciò che si vuole, if one has money one can get whatever one wants. Più si è ricco, più si è avaro, the richer people are, the more covetous they are. But although often practically a nominative it seems to be so far felt as a reflective pronoun as to be rarely used with a verb in the singular and an object in the plural. In Inghilterra s' impiccano gli omicidi (rather than s' impicca gli omicidi, though this form of phrase could also be used), in Francia si tronca loro la testa, in England murderers are hanged, in France their heads are cut off.

Before la, lo, li, le and ne, Si is changed into Se ; Se lo mangiarono tutto, they ate it all up.

(**B**) (L. *sic*, thus); 1. yes, distinguished from Si, oneself, by an accent Sì. 2. for tanto ; Non sono sì paziente che..., I am not so patient that... ; Sarebbe egli sì minchione, if he should be such a fool ; Sì e sì mi ha detto, he told me this and that. 3. Sì ... sì, both ; Lo faccio sì per il mio utile sì per il vostro bene, I do it both for my own profit and for your advantage. 4. Sì e no, more or less ; Sarà due litri sì e no, it will be two litres or thereabouts. 5. from the Yes of the marriage ceremony, Sì is sometimes said in the sense of a wedding ; T' aspetto al sì, I shall expect you at the wedding ; Quanti sì questa settimana, what a number of weddings in this week. 6. La lingua del sì, *i.e.* Italian.

Simifonti; "a strong fortress in the Valdelsa, S.W. of Florence; in 1202 it was captured and destroyed by the Florentines, with whom it had long been carrying on hostilities. Cacciaguida, in the Heaven of Mars, mentions it in connection with some individual (who has not been identified) of whom he says that his grandfather was a beggar at Simifonti while he, the descendant, had become a money-changer at Florence, D. Par. 16. 62. The point of Cacciaguida's allusion, which appears to be to some special circumstance, is not now understood. Some think the reference is to an incident in the taking of Simifonti by the Florentines, to whom the fortress was betrayed by one of its defenders, as is recorded by Villani; Casini thinks there may possibly be a reference to one of the Velluti family, who were well-known merchants and money-changers in Florence, and originally came from Simifonti. The special allusion may be to Lippo del Velluto who is mentioned by Dino Compagni (1, 18) as belonging to the government which expelled Giano della Bella in 1295." (Toynbee, Dante Dictionary.)

Etym. Fr. *sonde*, properly the lead used at sea in taking soundings, but the *vb.* *sonder* having been adopted by surgeons in sense of probing, the *sb.* *sonde* took a corresponding sense. The verb does not occur in Italian. *Sonder*, to take soundings, is from the old Fr. *sonde*, arm of the sea, borrowed from Scandinavian *sund* (> E. sound, with the same meaning), so that originally *sonder* was to try the depth where from the narrowness of the channel the water might probably be shallow. Modern Fr. *sonde*, the lead for sounding, is < *sonder*, to sound, so that its connection with old Fr. *sonde* is only indirect. The Scandinavian *sund* is probably for *swm-to*, from the same root as E. swim, with passive participial suffix, so that the meaning is, place which may be swum across.

Etym. Cogn. Fr. and Provenç. *sortir*, Span. *surtir*, of L. origin, but actual derivation uncertain. Hatzfeld and Darmstetter are inclined to regard it as the same word as Sortire (A), *sortir* having formerly had the meaning "to obtain by lot" in French as in Italian, but under reserve on account of the difficulty in the transition of meaning. Körting mentions several alternatives, all of which he rejects decisively except one, *viz.* that of derivation from L. *sortus*, a popular contraction of *surrectus*, *part.* of *surgere*, to rise; this form *sortus* is mentioned by Festus and is also seen in the *part.* of It. Sorgere. Körting's chief objection to this view is that the regular derivative would be a form in *-are*, not *-ire*, but that difficulty does not occur if we attribute the word to an original ***surrectire*. *V.* Skeat, *sub* Sortie.

Sóttosquadro *m.*; oblique cavity, a term used by silversmiths for those parts of a model which are sunk in at an acute angle from the general surface, the counterparts of which are corresponding parts of the form or mould which stick out, the one set fitting into the other, an arrangement which would make it impossible to separate the form from the specimen when it has been cast, without spoiling one or the other; this difficulty is met by the use of Tasselli, which are pieces made of the same material as the mould but separate from it and are placed in position in it; they correspond in shape to the several oblique cavities of the model.

The Tasselli are kept in their places inside the mould by means of a loop of string which passes into a wire stirrup or mesh, which was fixed in the substance of the Tassello while it was soft; it is then held by a little peg which serves to twist up and tighten the loop outside the mould. In this way the Tasselli can be taken out one by one by pulling each one in a suitable direction corresponding to the bends of the Sottosquadro (E. Sergent, Arti e Mestieri).

Stufare ; 1. to stew. 2. — una botte, *v.* Stufa (5). 3. to annoy, to weary.

Etym. dub. The immediate origin may be blt. *stufa*, > Provenç. *estuba*, *stuva*, Fr. *étuve*, Span. *estufa*, all meaning a hot room. The blt. word is attributed by Diez to O.H.G. *stupâ*, room, > Germ. *Stube*, *cp.* A.S. *stofa*, Swedish *stufva*, identified by Grimm with A.S. *stôw*, place, root *sta*, to stand fast. But this derivation is very doubtful, the alternative being that suggested by Bugge, *viz.* blt. **extufare*, on which theory the It. *vb.* Stufare would be the progenitor of Stufa *sb.* and the Germanic words borrowed from the Latin source. *Extufare* would be < L. *typhus*, = Gr. *τύφος*, exhalation, vapour, and Bugge's derivation accords with the historical fact that hot rooms were in use amongst the Romans earlier than amongst the Germans. *Cp.* Skeat, *ed.* 1910, *sub* Stove. For *typhus*, *v. infra*, Tifo.

Stufare, to nauseate (*cogn.* Fr. *étouffer*), certainly appears to point to **extufare*, *cp.* Lombard *dial.* Tufo, fetid exhalation, and in the dialect of the Val di Chiana, Tufea, dense mist, Stufare holding much the same relation to Tufo as Stuccare holds to *stunk*, *v. supra*, Stuccare (B).

Etym. mlt. *theodiscus*, > Germ. *deutsch.* "The first examples of the word are purely linguistic, and occur only in Latin texts: as *theodisca lingua* in the Lorscher Annalen A.D. 788, in the *Capitulare Italicum* 801, and in Smaragds Donatkommentar, about 805, as *sermo theotiscus* in Walahfrid Strabo about 840, as a single word *theodisca* in the catalogue of the Reichenau library, and as *theodisco*, 831, in the catalogue of the library of St Riquier. The oldest instance, *theodisce*, is in a report of the Cardinal archbishop George of Ostia to Pope Hadrian I.

That the primary sense of *theodiscus* had reference to language is shewn by old passages extending it to the language of other Germanic races, *viz.* Anglo-Saxon, 786, Lombard, 788 and 801, Gothic, 805 and 840. It no doubt arose in the Carolingian Empire for the purpose of expressing the languages of the six Rhine provinces by one term, the need for which was felt by the German Church from the time of the Mission of Boniface. Thus it is not a term of racial geography but of ecclesiastical politics, and on this account occurs in the first instance only in a Latin form: Otfried, about 860, has in his superscription I, 1 *cur autor hunc librum theodisce conscripserit*, but in the German text which follows he calls his German *thiu frenkiska zunga*" (Kluge, Etym. dict.).

Theodiscus is formed from O.H.G. *theoda*, people, akin to A.S. *thiod*, people, *cp.* Gothic *thiudiskō*, popular, national. The root is *tu*, to swell, *cp.* L. *totus*, Oscan *touto*, civic community. *V.* Skeat, *sub* Teutonic, Tumid, Walde, *sub Tumeo*, Kluge, *sub Deutsch.*

☞ Other terms for various kinds of open gallery are Balcone, Terrazzino, Verone, Ballatoio, which are distinguished as follows by E. Sergent in his Vocabolario domestico.

"It seems that Balcone as used by old authors is the same as Finestra, but it would not be so used in Tuscany now, unless possibly in a lofty style of writing and in reference to great houses. At Rome, Naples and elsewhere, a Balcone is what is called in Tuscany a Terrazzino.

"Terrazzino is a horizontal surface, generally of stone, projecting from the outer wall of a house; it is placed in front of a window opening down to the floor and is closed in by a railing or by balusters.

"The floor of the Terrazzino is generally on a level with that of the room. In some Italian cities it is termed Poggiuolo, a word which seems to have been used nearly in the same sense by old Tuscan authors.

"Terrazzo is an uncovered space in the upper floors, sometimes in the top floor of the house, open on one or more sides and protected by a railing, a balustrade, or a parapet.

"Verone was formerly used for either Terrazzo, Loggia, Andito, or Corridoio. At the present day, especially in country places, it is the landing, with a parapet or railing, at the top of an outside staircase parallel to the house wall.

"Ballatoio is a long balcony overhanging the courtyard or the street and serving to give access to various rooms. Another term for it is Ringhiera, the name of the part being taken for the whole. The name of Ballatoio is also given to the platform surrounding the base of a church dome either internally or externally, or to that running

round the interior of the church itself, its floor being formed by a widely-projecting cornice."

Etym. Cogn. Fr. *trompe*, trumpet, *trombe*, waterspout, Provenç. and Span. *trompa*, trumpet.

In sense of trumpet the word is < O.H.G. *trumpâ*, of Slavonic origin, *cp.* old Slavonic and Polish *tramba*, Slovenian *tromba*, *trôba*, trumpet, Russian *truba*, pipe, tube, trumpet, *v.* Skeat, *sub* Trump. An alternative but not probable derivation is < L. *triumphare*, through a form ***trumpare* > ***trumpa*, *vbsb.*; in the face of the Slavonic words this does not seem very convincing. Diez is inclined to trace Tromba, trumpet, to L. *tuba*, trumpet, though he does not offer *tubus*, tube, as origin of Tromba, suction-pipe; on the other hand he puts forward *turbo* as the source of Tromba, whirlwind. On the whole one may say that as trumpet the word is probably from the Slavonic source, as pipe perhaps from the same, and as whirlwind probably < L. *turbo*.

Tròppo; too much. Pur —, only too well. *much, D. Inf. 7. 25, Purg. 9. 124.

Etym. Cogn. Fr. *trop*, of unknown origin. Possibly < O.H.G. *thorp*, a word known only as meaning "village," *v.* Skeat, *sub* Thorp. But in Icelandic it also means "crowd," and it may be supposed to have had this sense among the people who passed it into Italian and French in the forms *troppo*, *trop*, and with the meaning "too much." *Cp.* Skeat, *sub* Troop, and *infra*, Truppa.

†Tròppolo *m.*; = Toppo coi piedi, block with legs.

Trottapiano *m.*; (*iron.*) slow-coach.

Trott-are *ind.* tròtto; to trot. *Aff.* -ata, -atína, -atóre, -atóra, -atrice, -erellare *dim.* to go trotting along.

Etym. Cogn. Provenç. Span. and Portug. *trotar*, old Fr. *troter* (> Fr. *trotter* and E. trot), old Fr. *trotier*, a trotter, messenger, mlt. *trotarius*, which answers so nearly to L. *tolutarius*, going at a trot, that it is usual to suppose old Fr. *troter* to result from a mlt. ** *tolutare*, to trot, by the common change of *l* into *r* and loss of *o*. *Tolutarius* is < *tolutim adv.*, at a trot, *lit.* "with a lifting up of the feet," < *tollere*, to lift, *v.* Togliere. This etymology is accepted by Diez, Littré and Scheler, and there seems to be no need for the alternative, *viz.* < M.H.G. ***trotten* (> O.H.G. *trottôn*), akin to O.H.G. *trëtan* (> Germ. *treten*), though this is adopted by Kluge.

Tròtto *m.*; trot. *Prov.* Il — dell' asino dura poco, of good intentions which are not kept up. Also elliptically, Il — dell' asino, with the same meaning. O di — o di rimbalzo, *i.e.* in one way or another.

Truc-oléntо, -uléntо (L.); truculent.

Truffa *f.*; 1. swindling. 2. (Roba) da —, of the poorest quality.

Etym. Cogn. old Fr. *trufle* (> Fr. *truffe*, truffle), Span. *trufa*, < L. *tuber*, *v.* Tubero. Old Fr. *trufle* meant both truffle, the edible fungus, and mockery, raillery, whilst Span. *trufa* still means both truffle and fraud, though modern French only has *truffe*, a truffle.

Derivation < L. *tuber* is evidenced by the Italian term for truffle, tartufo (= *terrae tuberem*), a word which passed into German as *tartoffel*, altered later into *Kartoffel*, to signify another kind of tuber, the potato. The corresponding English word is trifle, which is of course the old Fr. *trufle*, and occurs in early English in the sense of fraud, "theos ant othre trufles thet he bitrufleth monie men mide," these and other delusions that he beguiles many men with, Ancren Riwle, p. 106, quoted by Skeat, *ed.* 1910, *sub* Trifle; this meaning still lingers in the phrase, to trifle with.

Any small worthless object might give rise to a generic term for trifle or for raillery or even, if palmed off as valuable, for fraud, but it is curious that a truffle should have been the thing to achieve this distinction.

Truffaldíno *m.*; common fool in low comedy.

Truff-are; to swindle, *v.* Truffa. *Aff.* -atóre, -atrice, -ería.

The most probable derivation seems to be that of Körting, *viz.* < L. *veru*, spit, of which a *pl.* variant *verones* occurs in an inscription meaning the railings round a tomb, so that Verone originally referred to the balustrade protecting an outside landing. *Veru* corresponds to Irish *bir*, Breton *ber*, spit, *v.* Barra.

*Verra *f.*; = Guerra, war.

Verraccio *m.*; *pegg.* Verre, boar.

†Verrat *m.*; *v.* Caprisco.

Vèrr-e, -o *m.*; 1. boar. 2. a fungus, *v.* Verrino.

Etym. L. *verres*, *cogn.* Sanskr. *versas*, bull, Zend *versan*, stallion, Gr. ἄρρην or ἄρσην, male, root *wers*, to fall in drops, be distilled, *cp.* Sanskr. *varsati*, it rains, Gr. ἐέρση for ἐϝέρση, dew, L. *ros*, dew, the male animal being regarded as sprinkling, bedewing, *cp.* Skeat, *sub* Ox.

Verricèllo *m.*; 1. winch. 2. *i.q.* Burberino.

Etym. dub., but the word is no doubt akin to Verrina, auger, both being related in the same kind of way to L. *vertere*, *v.* Verrina.

Verrína *f.*; = Trapano, auger.

Etym. dub. Cogn. Sardinian *dial. berrina*, *barrina*, Fr. *vrille* (?), Span. *barena*, Catalan *barrina*, Portug. *verruma*, *barruma* (?), all meaning auger, blt. *verinus*, screw of a press; the kinship, however, is doubtful as regards the French and Portuguese forms, *vrille* being rather for *ville*, < L. *viticulus*, and *barruma* of Arabic origin. Diez attributes the group to L. *veruina*, short spear, < *veru*, *v.* Barra, but Körting, seeing the double *r*, considers ***vertebrina*, *dim.* of *vertebra*, in sense of turning instrument, a more probable source. A simpler supposition would be that the double *r* represents an original *rs*, so that Verrina and its cognates would belong to the stem *vers*, seen in L. *versus*, *part.* of *vertere*; this hypothesis would

also serve for Verricello. For *rs* > *rr*, *v. infra*, Verruca.

Verrin-are *ind.* verríno; to bore, *v.* -a.

*i. = Occhiata, look. ii. aperture, as that of a window, D. Purg. 10. 67, or of a tomb, D. Inf. 10. 52, meaning any opening through which it is possible to look. Similarly at Par. 30. 9 the meaning is "star," considered as a window into Heaven.

Visto; *part.* Vedere. *smart, ready.

Etym. The forms Veduto, Visto, which are alternative passive *parts.* of Vedere, show that there was a blt. *part.* **viditus* of L. *videre*, the passive *part.* of which in classical L. is *visus.* Visto as *adj.* is cognate to Provenç. *vistz* and old Fr. *viste*, > Fr. *vite.* Hatzfeld and Darmstetter regard the origin of these words as unknown, but derivation from **viditus* seems reasonable enough and is accepted by Littré and favoured by Diez. The transition of meaning is illustrated by Fr. *tôt*, *v.* Tosto. Or Visto may be for **Avvisto, = Avveduto, wary, ready, which could easily pass into meaning "smart." The modern word for "smart" is Vispo, which is probably a variant of Visto, the change of *t* into *p* being due to the influence of Vespa, Vipistrello, wasps and bats being lively creatures.
